The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action. Claims 82 and 83 are drawn to nonelected subject matter, by original presentation, and are withdrawn from consideration. These claims are distinct since they could be made by a materially different process.

Claims 64-66, 75, 80, 81 are rejected under 35 U.S.C. 103(a) as obvious over Aibe et al. taken with Gai.

Aibe teaches in columns 5, 8 and 28 impregnating active carbon with a dilute aqueous solution of KI only. The impregnation is deemed uniform, since the material has the whole outside surface contacted with the solution. The degree of saturation is an obvious expedient to optimize the reactivity versus cost; In re Boesch 205 USPQ 215, noting also Gai pg. 41.

The reference does not explicitly *use* 'granular' carbon (see column 31), however Gai pg. 48 teaches granular as an useful form. Using granules is an obvious expedient to increase the utility to include gas masks, nuclear stations etc.

The new washing step is an obvious expedient to optimize impregnant content; Aibe col. 6.

Claims 64-66, 75, 80, 81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gai taken with Aibe.

Gai teaches on pgs. 41, 44 and 49 doping activated carbon granules with 1.5% KI. The sole difference is that Gai does not teach heating to dry.

However, Aibe teaches drying KI impregnated active carbon by low-temperature heating. Using this in the process of Gai is an obvious expedient to quickly dry the material. The new washing step is an obvious expedient to optimize impregnant content; Aibe col. 6.

Applicant's arguments filed 2/18/05 have been fully considered but they are not persuasive.

The Henning reference has been determined to have a publication date after the present filing date. No criticality is seen between a particle and a monolith; their substitution is a matter of

Art Unit: 1754

obvious optimization. It is not seen how the present process would have a different mode of action versus the references. The intended use is not being examined; arguments thereto are not persuasive.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication should be directed to examiner Hendrickson at telephone number (571) 272-1351.
